

I do not wish to have any telemarketer calling me at my home. Before I signed up for the no call list it seemed every time the phone rings it was one of them. Now we tell people we know that we will not answer our phone unless they talk after the answering machine picks up. This is how bad our home phone was. Thank you for having this option available. I do not wish to give them any option of calling if I want their service I will contact them.
